

# Outdoor Tiles Outgrown Solutions

Being into an exclusive business of supplying natural stone products, OUTDOOR & GENERAL has aced its quality products and workmanship throughout Australia. This exclusive business requires out-of-the-box visualization of outdoor specific technology, and tilesview thus delivers the highest quality of its reach to them.

## Stunning Outdoor Products: Remarkable Views

Customers at O&G use tilesview to view uncommon tile designs going exactly with their needs and answering a number of questions with just one click and view. This aids the business by providing instant visualization of their products and an easy customer buying process.

## Click Room Feature A Tilesview Terrific

Tilesview's unique click room feature allows the users to upload pictures of their own room to be visualized with the numerous tile designs. A perfect visualization pops out an exact expected image of the room, imagined.

## 30 Minutes Integration: Free Ownership of Website Integration

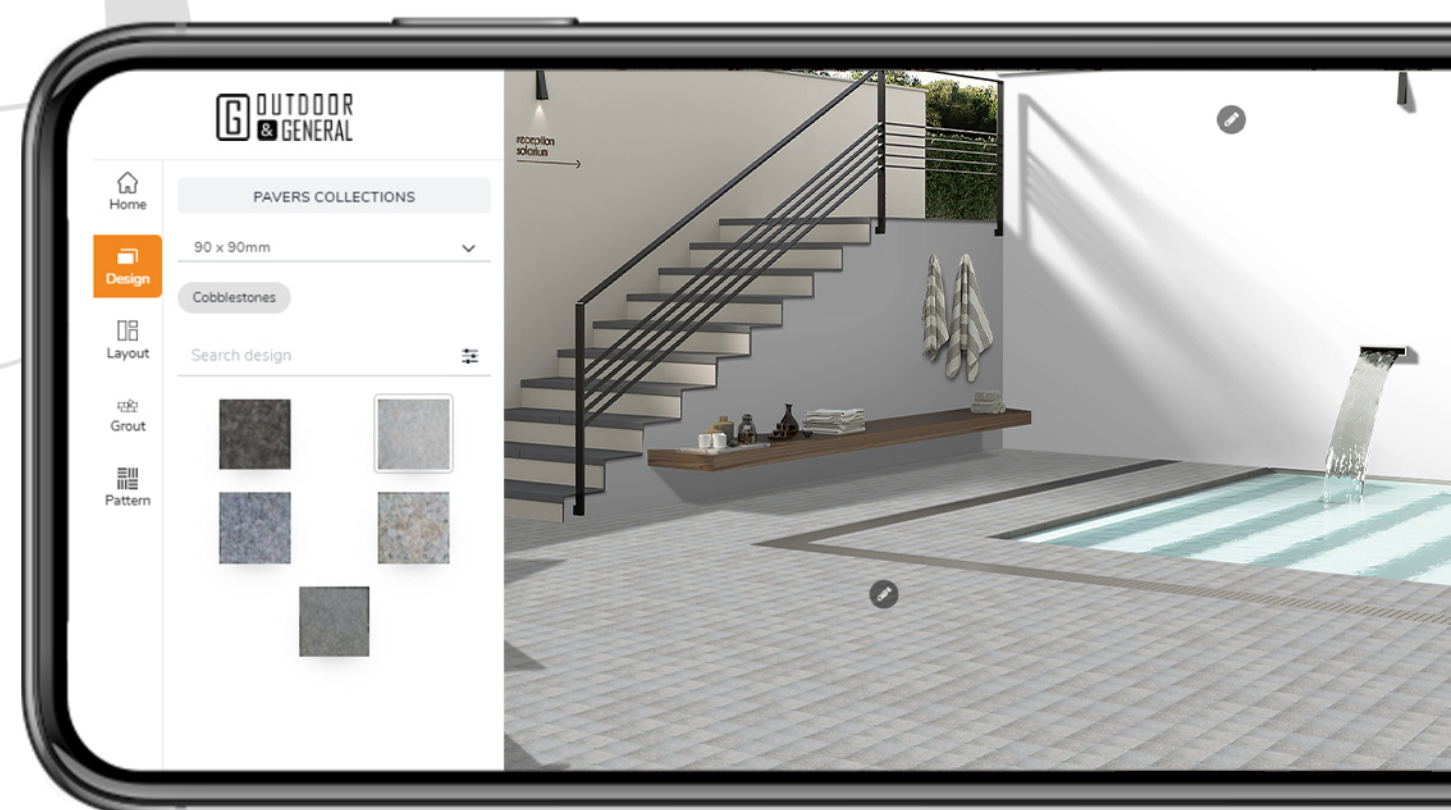

Outdoor and General got its Tilesview integration in a mere time of 15 minutes which has so far helped them deliver an unmatched scope of creating instant catalogues and helping users visualize stunning outdoor tiles throughout Australia.

## User Friendly Technology: Multiple User Access to the Visualizer

The very first answer to the user access related question of O&G helped Tilesview to showcase its foremost product feature of being completely user friendly. Tool integration on your website would allow multiple users to access the visualizer at the same time without any load.

“

It is very important for a tile user to know how the tile will appear on the surface and we couldn't be more happy to have tilesview for an exclusive push to our business by providing their tile visualizer for our outdoor tiles.

# Welcome to Outdoor & General

The everything store for Outdoor Pavers

Being a leading supplier of Natural stone products, Outdoor and General continues to outgrow its reach to the entire Australian manufacturers by delivering an undivided shopping experience.

An efficient visualization tool shots down all the challenging points to the nature of the product. A single tile can be used for an end number of options available, on varied surfaces. To provide a perfect hand towards the best selection of expected views of the room, tilesview sets in.

Tilesview's advanced AI technology and use of Amazon Web Services allows users to select their choice of floor and wall surface including features such as varied layout modes, tile calculator, instant e-catalogue, and much more. These capabilities of many more factors led Outdoor and General, one of the most outstanding outdoor tile suppliers in Australia, to choose tilesview.

“TilesView is an innovating way to visualise wall & floor tiles. The program is user friendly, and the support team are always available. I would recommend tilesview for its time saving features and ability to illustrate the look of tiles in different environments from the comfort of your own computer.
